From fund to token

How a new Australian fund becomes a token on Redbelly Network, through Tokeniser.

Task	TASK-26, Tokenisation Explainer Animation
Asset	A new Australian fund
Length	1:23 (83.6 seconds)
Video	1920 x 1080, 30 fps, H.264 MP4, subtitles burned in, plus SRT and WebVTT files
Voice	Synthetic voice, Kokoro-82M v1.0, ONNX build, voice af_heart
Script version	1
Last verified	14 Oct 2026, every quote checked against a snapshot of its source page

How to read this document

Section 1 is the script as it plays: the voiceover word for word and the text shown on screen. Section 2 lists every factual claim, the source page it comes from and the exact words on that page. Section 3 lists the source pages with the time each snapshot was taken and its SHA-256.

1. Script

Time	Voiceover	On screen
0:00 to 0:07 Intro	Here is how a new Australian fund becomes a token on Redbelly Network, through Tokeniser, in 4 stages.	From fund to token A new Australian fund, tokenised on Redbelly Network through Tokeniser
0:08 to 0:13 What tokenisation means	Tokenisation records ownership as digital tokens, and lets you program the rules of the asset.	Ownership, recorded as digital tokens Rules, programmed into the asset
0:14 to 0:24 Stage 1, legal preparation	Stage 1, legal preparation. The fund's documents must allow ownership to be recorded on a blockchain. No separate tokenisation licence is needed in Australia.	Stage 1 Legal preparation Fund documents allow ownership records on a blockchain No separate tokenisation licence in Australia
0:25 to 0:32 Stage 2, platform onboarding	Stage 2, platform onboarding. The manager and the fund are verified on Tokeniser, and the token is designed.	Stage 2 Platform onboarding Manager and fund verified Token designed: asset class and rules
0:32 to 0:41 Stage 3, compliance configuration	Stage 3, compliance configuration. Identity checks, who may invest, and transfer limits are encoded into the token and enforced automatically.	Stage 3 Compliance configuration Identity checks (KYC/AML) Who may invest Transfer limits Enforced automatically

Time	Voiceover	On screen
0:42 to 0:51 Stage 4, investor register	Stage 4, the investor register. Each investor verifies their identity and gets a digital wallet. No tokens are issued until then.	Stage 4 Investor register Identity verified Digital wallet set up No tokens before verification
0:51 to 1:00 Token issuance	Tokens are then issued on Redbelly Network, into verified wallets. From the first token, this register is the official record of ownership.	Tokens issued on Redbelly Network Into verified wallets Official ownership record from the first token
1:00 to 1:10 Transfers	Every transfer is checked against the rules first, and breaches are rejected. When investors hold their own wallet, transfer and payment complete together, in seconds.	Every transfer checked first Breaches rejected Own wallet: transfer and payment together, in seconds
1:10 to 1:20 Close	Tokeniser operates on Redbelly Network, Australia's public digital token infrastructure, where transactions are confirmed once and cannot be reversed.	Tokeniser operates on Redbelly Network Australia's public digital token infrastructure Transactions confirmed once, cannot be reversed tokeniser.com

Stage tracker, shown in scenes 1, 2, 3, 4, 5, 6, 7: 1 Legal preparation, 2 Platform onboarding, 3 Compliance configuration, 4 Investor register. The current stage is highlighted.

2. Fact check

#	Script says	Source	Exact words on the source page
1	on Redbelly Network, through Tokeniser	Tokeniser, home page and FAQ https://tokeniser.com/	"Tokeniser operates on Redbelly Network, Australia's public digital token infrastructure"
2	a new Australian fund	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"New funds can be established natively on tokenised infrastructure; existing funds can be migrated."
3	in 4 stages	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"The process has four stages: legal preparation, platform onboarding, compliance configuration, and investor register establishment."
4	records ownership as digital tokens, and lets you program the rules of the asset	Tokeniser, home page and FAQ https://tokeniser.com/	"Tokenisation records ownership of financial products and services as digital tokens, and lets you program the rules of the asset."
5	Stage 1, legal preparation	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"Legal review of constitutional documents is a required first step."

#	Script says	Source	Exact words on the source page
6	documents must allow ownership to be recorded on a blockchain	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"Some documents need amendment to permit on-chain ownership records and electronic transfer."
7	No separate tokenisation licence is needed in Australia	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"There is no separate tokenisation licence required in Australia."
8	platform onboarding on Tokeniser	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"Once the legal framework is in place, the fund manager completes Tokeniser's platform onboarding process."
9	The manager and the fund are verified	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"Complete entity verification for the fund manager and the fund."
10	the token is designed: asset class and rules	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"For new funds, design the token parameters: asset class, compliance rules, and corporate action schedule."
11	Identity checks (KYC/AML)	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"Configure KYC/AML verification requirements for investors."
12	who may invest	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"Set investor eligibility criteria, wholesale status, accredited investor status, and foreign investor limits."
13	transfer limits	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"Set transfer restrictions, lock-up periods, permitted transferee classes, and any fund-specific restrictions."
14	encoded into the token and enforced automatically	Tokeniser knowledge hub: How does Tokeniser work https://tokeniser.com/resources/knowledge-hub/platform/how-does-tokeniser-work	"Compliance rules are encoded into the token at issuance and enforced automatically at every transfer."
15	Each investor verifies their identity and gets a digital wallet	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"Investors complete digital onboarding, identity verification, investor classification, and wallet setup, before their tokens are issued."

#	Script says	Source	Exact words on the source page
16	No tokens are issued until then	Tokeniser knowledge hub: How does Tokeniser work https://tokeniser.com/resources/knowledge-hub/platform/how-does-tokeniser-work	"Until onboarding is complete and the wallet is verified, tokens cannot be issued to or transferred to that investor."
17	issued on Redbelly Network, into verified wallets	Tokeniser knowledge hub: How does Tokeniser work https://tokeniser.com/resources/knowledge-hub/platform/how-does-tokeniser-work	"Tokens are minted on Redbelly Network and transferred to the verified investor wallets."
18	this register is the official record of ownership	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"The on-chain register is the register of record from day one."
19	From the first token	Tokeniser knowledge hub: How to tokenise a fund in Australia https://tokeniser.com/resources/knowledge-hub/australia/how-to-tokenise-a-fund-in-australia	"For a new fund, the investor register is established on-chain at the point of the first token issuance."
20	Every transfer is checked against the rules first	Tokeniser knowledge hub: How does Tokeniser work https://tokeniser.com/resources/knowledge-hub/platform/how-does-tokeniser-work	"Every transfer is checked against configured compliance parameters before submission."
21	breaches are rejected	Tokeniser knowledge hub: How does Tokeniser work https://tokeniser.com/resources/knowledge-hub/platform/how-does-tokeniser-work	"Transfers to unverified wallets, ineligible investors, or in breach of restrictions are rejected."
22	When investors hold their own wallet	Tokeniser knowledge hub: How does Tokeniser work https://tokeniser.com/resources/knowledge-hub/platform/how-does-tokeniser-work	"the investor either holds their own private key (non-custodial wallet)"
23	transfer and payment complete together, in seconds	Tokeniser knowledge hub: How does Tokeniser work https://tokeniser.com/resources/knowledge-hub/platform/how-does-tokeniser-work	"For non-custodial wallets, atomic settlements, transfer and payment complete simultaneously in seconds."
24	Tokeniser operates on Redbelly Network, Australia's public digital token infrastructure	Tokeniser, home page and FAQ https://tokeniser.com/	"Tokeniser operates on Redbelly Network, Australia's public digital token infrastructure"
25	transactions are confirmed once and cannot be reversed	Redbelly Network: Asset tokenisation https://redbelly.network/asset-tokenisation	"Deterministic finality ensures transactions are confirmed once and cannot be reversed"
